

The neural network for Indian FMCG retail.

MarCat /Market/ — two nodes live in production, two built.

Imagine MarCat doesn't exist.

This is your world today.

13 million kiranas. Zero network.

Switch the network on.

Retailer + Consumer live. Brand + Supplier built, ready to activate.

FOUR NODES · ONE DATABASE · ONE GRAPH — NOT FOUR APPS BOLTED TOGETHER

13 million kiranas. One network.

One sale. Every node updates.

A single kirana sale becomes a shared commercial event — live for the retailer today, and for the distributor and brand the moment their node lights up.

SALE → STOCK → DEMAND → SELL-OUT → LOYALTY → AI REORDER

The transaction is the network. Every sale tightens it.

STEPS ① ④ LIVE TODAY (RETAILER + CONSUMER) · STEPS ② ③ ACTIVATE THE MOMENT A DISTRIBUTOR OR BRAND NODE LIGHTS UP

Not a prototype. A running store.

Live at the supermarket lab since 27 April 2026 — real bills, real customers, every single day.

₹10.5L GMV PROCESSED · 71 DAYS LIVE, A BILL EVERY SINGLE DAY

The platform is production-grade. The demand test is what we raise for.

CAPTIVE R&D LAB, NOT A PAYING CUSTOMER — PROOF THE SOFTWARE RUNS AT REAL RETAIL SCALE, NOT PROOF OF MARKET DEMAND

Why this is inevitable now.

Five shifts just made a connected kirana network buildable for the first time.

The rails now exist. The wire between them doesn't. That's the opening.

GST · UPI · CHEAP ANDROID · WHATSAPP COMMERCE · USABLE AI — NONE OF THIS WAS TRUE FIVE YEARS AGO

We sell cities, not India.

Each metro holds thousands of GST-billing kiranas + hundreds of FMCG distributors — every one a node.

Y3: ₹70L per metro baseline (retailer + supplier) · ₹5.7 Cr brand-side national (46 brands × per-city) · ~₹13 Cr total network ARR.

OUT OF SCOPE: QUICK COMMERCE + LARGE MODERN TRADE CHAINS

Each layer has its tools.

We built ours at all four — and the wire that connects them.

Every incumbent monetizes one layer. Connecting all four cannibalizes their own model — so they won't.

EACH LAYER: WELL-SERVED BY EXISTING TOOLS · THE CONNECTING LAYER: EMPTY · MARCAT: 4 CHIPS · 3-MONTH BUILD · LIVE SINCE 27 APRIL 2026

We don't build a sales engine. We ride India's distribution.

A distributor's salesman onboards a kirana → his orders go digital, his beat gets faster, his schemes get visible. He has a reason to spread us.

Every new node has a reason to onboard the next. The graph pulls itself tight.

BEACHHEAD: 1 STORE → 5 FOUNDER-LED → 15-25 PAID ACROSS AHMEDABAD (18-24 MO) – PROOF OF REPEATABILITY BEFORE CITY-SCALE

Everyone owns one layer. We own two.

Bizom owns the salesman. Marg owns the till. No one has built for both the till and the warehouse feeding it. We have — and that adjacency compounds as each node goes live

The graph compounds. Switching costs grow with use.

L1 TECH (LIVE, DEEP MARKET PENETRATION THROUGH Y5) · L2 FULFILLMENT (Y5) · L3 CREDIT ACROSS NODES (Y8) · L4 AI-GUIDED COMPLETE INFRA (Y10+)

GST CHAIN COMPOUNDS WITH EVERY NEW NODE LIVE – RETAILER TODAY, FULL CHAIN AT L2

How we charge.

Pricing model live. First paying customer onboards post-incubation.

Asset-light. Software-only. No inventory, no fulfillment.

COMPARABLE: VYAPAR ₹3-7K · MARG ₹8-15K · PETPOOJA ₹10-12K · RETAILER PORTAL PRO ₹15K

The team.

Swarbhanu Gupta

FOUNDER · OPERATOR

8+ yrs FMCG software · Ex-VP Sales CultureX
Earlier: Bizom · Happay · Qoruz · 55+ B2B closes

*Built a supermarket from scratch — then built MarCat
to run it. Sole engineer: 6 portals · 7 AI endpoints.*

Divya Pandya

CO-FOUNDER · OPERATIONS

7+ yrs HR & People Ops · Ex-Country Lead, Outsourced
Earlier: Intugine · B.Tech + MBA

*Runs daily store ops + cashier training at the
supermarket lab since 27 April 2026.*

FIRST HIRES (THIS ROUND): 2 FIELD REPS + ENGINEER + CS · 50+ STORES: SALES SCALE-UP

CODE WRITTEN AND TESTED INSIDE A LIVE SUPERMARKET LAB

13 · ASK

The ask.

Pre-seed · SAFE · 18-24-month runway

₹75 LAKH ₹1 CRORE

TARGET

STRETCH · ₹7 CR CAP

MILESTONE: REPEATABLE PAID RETAILER ACQUISITION · SELL-OUT LOOP LIVE · EARLY MONETIZATION

ENGINEERING

sell-out loop + reliability

FIELD GTM

repeatable acquisition

CUSTOMER SUCCESS

onboard + convert to paid

*Self-sufficient raise — grants treated as upside, not counted.
Already live at the lab; this funds repeatable retailer adoption.*

We've built the network. Now we light it up.

3 months of build. Live at the supermarket lab since 27 April 2026.
