

The shared transaction layer for Indian FMCG.

One transaction. One shared operational state. Four participants acting from the same reality.

One transaction. Four decisions.

A shopper buys one unit.

The transaction is shared. The understanding isn't.

Synchronize the transaction.

Each participant sees the same transaction through a workflow built for them.

FOUR INTERFACES · ONE DATABASE · ONE SHARED STATE

Two decisions synchronized today, four by design.

A single bill. Four decisions follow.

One ₹250 grocery bill isn't a sale — it's an information event. Replenishment, distributor planning, brand intelligence, and loyalty that travels.

₹250 BILL → STOCK → DEMAND → SELL-OUT → LOYALTY

One write. Reused by four participants.

OPERATIONAL INTELLIGENCE = INVENTORY TRUTH + DEMAND VISIBILITY + SELL-OUT VISIBILITY, FROM ONE TRANSACTION ·
RETAILER + CONSUMER LIVE TODAY · BRAND + SUPPLIER BUILT

Not a prototype. A running store.

Live at Banjara — an independent supermarket in Ahmedabad — since 27 April 2026. Real bills, real customers, every single day.

₹15.5L GMV PROCESSED · 104 DAYS LIVE · 6,728 SKUS

The demand test is what we raise for.

CAPTIVE R&D LAB, NOT A PAYING CUSTOMER · PROOF THE SOFTWARE RUNS ON REAL RETAIL TRANSACTIONS, NOT PROOF OF DEMAND

Why this is inevitable now.

MarCat isn't a new behavior. We connect what already happens.

India digitized every participant. Nobody synchronized them.

GST · UPI · CHEAP ANDROID · WHATSAPP COMMERCE · USABLE AI – NONE OF THIS WAS TRUE FIVE YEARS AGO

We sell cities, not India.

We don't need the market to be huge. We need to prove the model in the stores that fit it.

STORES TO PROVE THE
MODEL

DIRECTORY COUNTS · NOT ICP-QUALIFIED

SOURCE: SMARTSCRAPERS DIRECTORY DATA, 1 APRIL 2026 · OUT OF SCOPE: QUICK COMMERCE + LARGE MODERN TRADE CHAINS

Each participant has its tools.

Every tool optimizes one participant. None synchronize all four.

EACH PARTICIPANT: WELL-SERVED BY EXISTING TOOLS · THE CONNECTING LAYER: EMPTY

We don't build a sales engine. We ride India's distribution.

Start founder-led. Then follow the relationships already serving these stores.

The raise proves the channel — not the network effect.

Incumbents built software for participants. We build infrastructure for the transaction.

One transaction becomes more useful as more participants can act on it.

↻ EACH CYCLE STARTS FROM MORE STORES THAN THE LAST

EXPANSION PATH — ● RETAILER OS · ● DISTRIBUTOR · ● BRAND · ● CREDIT & FULFILMENT

How we charge.

Asset-light. Software-only.

EXISTING RETAIL SOFTWARE PRICE RANGE – VYAPAR ₹3-7K · MARG ₹8-15K · PETPOOJA ₹8,500 FLAT

Built from inside the problem.

We didn't design this for a supermarket. We built it inside one.

Swarbhanu Gupta

FOUNDER · OPERATOR

8+ yrs FMCG software · Ex-VP Sales CultureX
Earlier: Bizom · Happay · Qoruz · 55+ B2B closes

Built the operating system inside a live supermarket.

Divya Pandya

CO-FOUNDER · OPERATIONS

7+ yrs HR & People Ops · Ex-Country Lead, Outsourced
Earlier: Intugine · B.Tech + MBA

*Runs daily store ops + cashier training at the
supermarket lab.*

OPERATE → OBSERVE → BUILD → SHIP

SUPERMARKET OPEN SINCE 5 JAN 2025 · MARCAT LIVE INSIDE IT SINCE 27 APR 2026

₹75L to prove MarCat can repeat beyond one store.

One store proves the system. Multiple stores prove the model.

₹75 LAKH ₹1 CRORE

TARGET

STRETCH · ₹7 CR CAP

PROOF TARGET · 15-25 PAYING STORES · AHMEDABAD · 24 MONTHS FROM CLOSE

VALIDATION ROUND · NOT A REVENUE FORECAST

ENGINEERING

repeatable deployment + reliability

FIELD GTM

repeatable acquisition

CUSTOMER SUCCESS

onboard + convert to paid

Self-sufficient raise — grants treated as upside, not counted.

Pre-seed SAFE · 18–24 months runway · ₹7 Cr cap

One supermarket is live. Every transaction makes the next one more valuable.
